

FortiAppSec Cloud GSLB Service

Highlights

DNS-Based Global Server Load Balancing

Traffic distributed to multiple servers ensures optimal performance and reliability.

Health Checks

Monitor application endpoints and cloud services health for proactive resource management.

Business Continuity

Dynamic traffic rerouting based on health checks, Geo-location, and application RTT minimizes the impact of disruptions.

Ease of Deployment

Simplified and effective GSLB solution.

Ensuring business continuity through Global Server Load Balancing (GSLB)

Running a globally distributed application necessitates a robust strategy to address disruptions and ensure uninterrupted connectivity. Global redundancy involves implementing redundant hybrid applications (on-prem and on-cloud) to mitigate the impact of disruptions, enhance resilience, and maintain connectivity even in the face of application challenges.

Highlights

Autoscale Solution

- No hardware performance bottleneck
- Stackable license to increase performance
- Eliminates need to accurately estimate application volume in advance

Intelligent Traffic Management

- Advance load balancing according to server/site availability
- Supports DNS services and load balancing-based application health

Improved Performance

- Deliver to closest servers based on geography
- Performance-based routing based on client-driven performance metrics
- Reduced latency and increased application responsiveness

Improved Risk Management

- Automate detection and execution of failover services
- Customizable health checks with choice of protocols and parameters: Ping, DNS, TCP, HTTP/S, layer-7 Response code or content

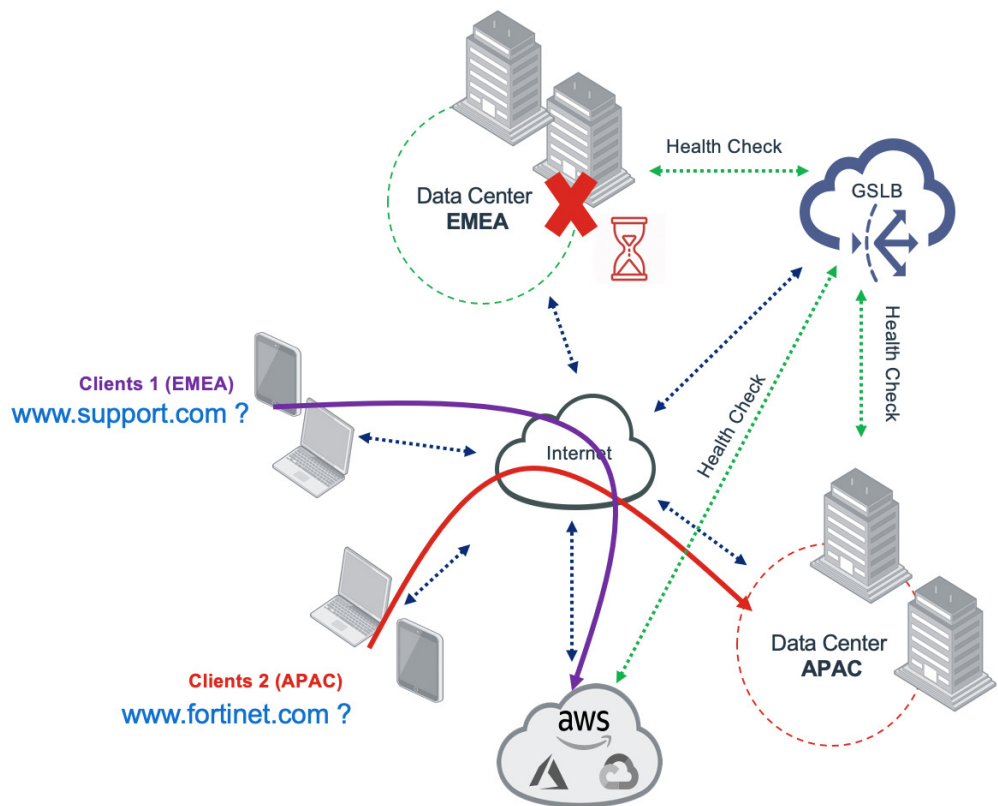

Introduction

GSLB Service is a DNS-based service designed to guarantee business continuity by keeping applications online and available, even in the face of localized application issues. Using custom health checks, the Global Server Load Balancing (GSLB) solution monitors application endpoints or cloud services. It aims to optimize the availability, user experience, and application security of enterprise applications.

Deployment

How it works?

GSLB Service provides load balancing across multiple datacenters (active/active) and cloud applications based on GSLB Policies, with site selection according to application/server availability (health checks) and client geolocation.

Key Features

Intelligent Traffic Management

GSLB Service optimizes client requests for a specific domain by dynamically distributing the workload across virtual servers, data centers, and locations. You can route traffic to your network resources based on geography, server performance (CPU/memory) and load, measured client and network performance, weighted distributions, consistent (sticky) routing, and more.

Advanced Health Check

GSLB Service monitors your application end points or your cloud services based on configurable health checks. All of your resources are monitored continuously in real-time. Customizable health checks let you choose your protocol and parameters, from simple ping to an Application layer-7 response content match.

DNS Services

GSLB Service offers full DNS Services (Primary and Secondary), includes DNSSEC and standard DNS Zone and full support with the following resources types as A/AAAA record, CNAME, NS, MX, TXT, SRV, and PTR.

Synthetic Testing

Synthetic testing checks applications availability by sending probes to applications from GSLB Service. It can be used to monitor application website services or application endpoints at various network layer, and the results of these tests can provide valuable information on application up/down time, availability, and regional performance issues.

Fabric Connectors

GSLB Service is part of Fortinet Security Fabric with multiple connectors to FortiADC, SD-WAN and FortiGate.

The configuration on the GSLB Service will be automatically sync the VIP, SD-WAN configuration from the FortiGate, FortiWeb, and FortiADC through RestAPIs.

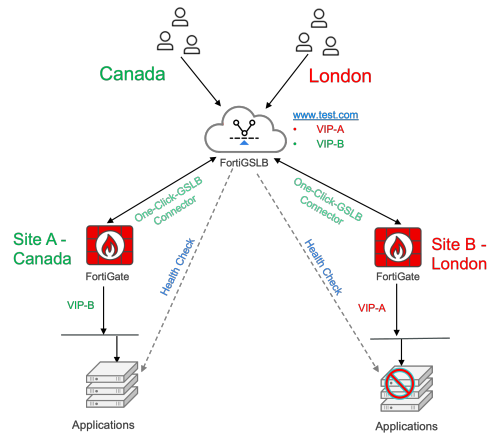

Seamless Failover to Second Closest Service

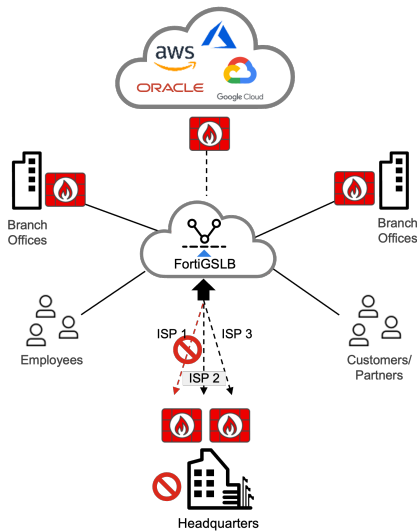

- Zero software/hardware needed
- No hardware performance bottleneck
- Managed via web interface
- Integrated API with Fortinet family
- One-click GSLB: Automate on-premise FortiGate, FortiWeb, and FortiADC configuration to GSLB Service via API

Use Cases

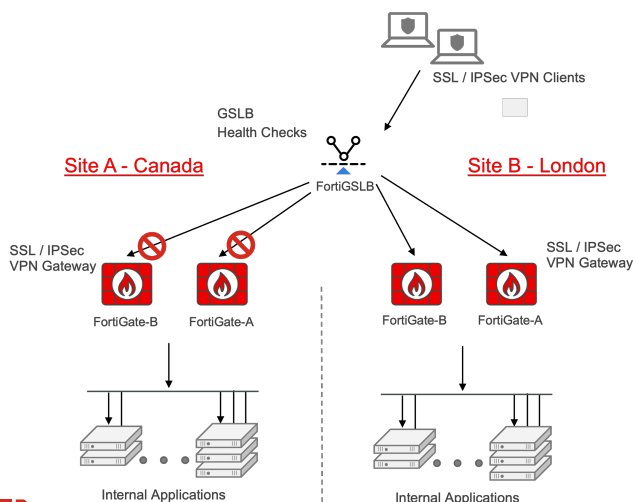

Application Anywhere with FortiGate ZTNA and VIP, more info [here](#)

Fortinet Secure SD-WAN for Hybrid and Multi-Clouds

VPN Always-On using GSLB Service

Application Anywhere with FortiGate

Enabling One-Click GSLB on FortiGate to synchronize the FQDN of the FortiGate VIP or ZTNA Policy

Improve Client QoE, application latency and business continuity

Optimize Application Access:

- Publish a new FQDN in a second
- Automation via "One-Click-GSLB"
- Service Continuity
- Improve user QoE
- Multi-site visibility
- LB decision according to Geo-IP, load, latency, and application availability

Optimize SD-WAN

Ensure SD-WAN traffic follows optimal paths based on network and device performance checks.

SD-WAN Orchestration Across Clouds and Data Centers

Optimization of SD-WAN:

- Increase network efficiency
- Full WAN optimization
- Service continuity during a disaster or attack
- Improve user QoE

Speed Fortinet VPN Gateways

Direct VPN clients to the optimal VPN gateway by tracking the health/performance of FortiGates.

Improve Client Experience by Ensuring VPN Traffic Follow Best Available Path

Optimize VPN performance:

- Improved VPN performance
- Improve user QoE
- Increase availability of VPN
- Scale FortiGates
- Always-On

Feature Summary

GSLB Benefits

- ANYCAST support - Multi-Region (US/EMEA and APAC) deployment of FortiGSLB for best response time
- Advanced global server load balancing
- Rolls out in minutes (no migration/coding necessary)
- Easy to deploy
- Integration with Fortinet family products

DNS Services

- Primary and Secondary DNS Server
- DNSSEC Support
- Support IPv4 and IPv6
- FQDN and zone services
- Advanced DNS policy
- Support DNS records:
 - A/AAAA (address record)
 - CNAME (canonical name record)
 - MX (mail exchange record)
 - NS (name server record)
 - PTR (pointer record)
 - SRV (service locator)
 - TXT (text record)
- Service selection:
 - Weight: DNS queries are load-balanced by weight.
 - DNS-Query-Origin: DNS queries are load-balanced to the pool with the same geographic information.
 - Global Availability: DNS queries are load-balanced to the first available pool.

Management

- License visibility
- Central view (grid and list)
- Monitoring and site overview
- DNS history statistics

Health Check

- Support for various application/protocol validations:
 - TCP port
 - TCP echo
 - ICMP
 - DNS
 - UDP
 - HTTP (GET/HEAD/Connect)
 - HTTPS (SSL validation, TLS 1.2, 1.3)
- Health check match for user/password, hostname, string validation, response code
- AND/OR relationship

Load Balancing

- **GEO:** FortiGSLB performs load balancing according to the request's source geographic location.
- **Least Connection:** FortiGSLB Cloud load balances traffic to the virtual server with the least connections.
- **Connection Limit:** FortiGSLB Cloud performs load balancing according to the virtual server connection limit determined by the virtual server weight. The greater a virtual server weight, the more responses it gets.
- **Bytes Per Second (BPS):** FortiGSLB Cloud load balances traffic to the virtual server with the least BPS.
- **Server Performance:** FortiGSLB Cloud load balances traffic to the server with the lowest load (memory and CPU). Virtual servers with better server performance in the CPU or memory (whichever one you give more weight to) respond.

Security Fabric

- FortiADC
- FortiGate SD-WAN
- FortiGate SSL-VPN
- FortiGate ZTNA/VIP
- FortiWeb

Ordering Information

GSLB SOLUTION	SKU	Description
GSLB Service		
GSLB Service	FC2-10-CGSLB-330-02-DD	GSLB Service — 100 QPS (queries per second) — Annual Subscription. Includes 24×7 FortiCare. Select Health Checks separately.
	FC3-10-CGSLB-330-02-DD	GSLB Service — 500 QPS (queries per second) — Annual Subscription. Includes 24×7 FortiCare. Select Health Checks separately.
	FC4-10-CGSLB-330-02-DD	GSLB Service — 1000 QPS (queries per second) — Annual Subscription. Includes 24×7 FortiCare. Select Health Checks separately.
GSLB Service with Additional Advanced Health Checks	FC1-10-CGSLB-332-02-DD	GSLB Service — Additional 2 Advanced Health Checks.
	FC2-10-CGSLB-332-02-DD	GSLB Service — Additional 10 Advanced Health Checks.
	FC4-10-CGSLB-332-02-DD	GSLB Service — Additional 100 Advanced Health Checks

Annual fee based on a DNS QPS and health checks.
Stackable license.

Ordering Information

The service requires a FortiCloud Premium subscription as described in the FortiCloud service description, along with the following product-specific license.

FORTIAPPSEC CLOUD SOLUTION	SKU	DESCRIPTION
FortiAppSec Cloud WAF		
Bandwidth	FC1-10-UCAPF-1114-02-DD	FortiAppSec Cloud. Cloud WAF, 25 Mbps Standard Plan (Use seat 1). Includes FortiCare premium support.
	FC2-10-UCAPF-1114-02-DD	FortiAppSec Cloud. Cloud WAF, 50-99 Mbps Standard Plan (25Mbps/seat). Includes FortiCare premium support.
	FC3-10-UCAPF-1114-02-DD	FortiAppSec Cloud. Cloud WAF, 100+ Mbps Standard Plan (25Mbps/seat). Includes FortiCare premium support.
	FC1-10-UCAPF-1115-02-DD	FortiAppSec Cloud. Cloud WAF, 25 Mbps Premium Plan (Use seat 1). Includes FortiCare premium support.
	FC2-10-UCAPF-1115-02-DD	FortiAppSec Cloud. Cloud WAF, 50-99 Mbps Premium Plan (25Mbps/seat). Includes FortiCare premium support.
	FC3-10-UCAPF-1115-02-DD	FortiAppSec Cloud. Cloud WAF, 100+ Mbps Premium Plan (25Mbps/seat). Includes FortiCare premium support.
Applications	FC1-10-UCAPF-1116-02-DD	FortiAppSec Cloud. Cloud WAF, 1-4 Applications, Standard Plan. Must be combined with a Bandwidth Standard plan. Includes FortiCare premium support.
	FC2-10-UCAPF-1116-02-DD	FortiAppSec Cloud. Cloud WAF, 5-24 Applications, Standard Plan. Must be combined with a Bandwidth Standard plan. Includes FortiCare premium support.
	FC3-10-UCAPF-1116-02-DD	FortiAppSec Cloud. Cloud WAF, 25+ Applications, Standard Plan. Must be combined with a Bandwidth Standard plan. Includes FortiCare premium support.
	FC1-10-UCAPF-1117-02-DD	FortiAppSec Cloud. Cloud WAF, 1-4 Applications, Premium Plan. Must be combined with a Bandwidth Premium plan. Includes FortiCare premium support.
	FC2-10-UCAPF-1117-02-DD	FortiAppSec Cloud. Cloud WAF, 5-24 Applications, Premium Plan. Must be combined with a Bandwidth Premium plan. Includes FortiCare premium support.
	FC3-10-UCAPF-1117-02-DD	FortiAppSec Cloud. Cloud WAF, 25+ Applications, Premium Plan. Must be combined with a Bandwidth Premium plan. Includes FortiCare premium support.
FortiAppSec Cloud Add-ons		
DAST	FC1-10-UCAPF-216-02-DD	FortiAppSec Cloud. Vulnerability Scanning Service, 10 IP/FQDN. Must purchase Cloud WAF as well.
SOCaaS	FC1-10-UCAPF-464-02-DD	24×7 cloud-based managed log monitoring, incident triage and SOC escalation service for Cloud WAF. 1-4 applications (seats), price per application. Must purchase for all applications in account.
	FC2-10-UCAPF-464-02-DD	24×7 cloud-based managed log monitoring, incident triage, and SOC escalation service for Cloud WAF. 5+ applications (seats), price per application. Must purchase for all applications in account.
FortiAppSec Cloud Standalone Services		
GSLB	FC1-10-UCAPF-330-02-DD	FortiAppSec Cloud. Global Server Load Balancing, 100 QPS (queries per second). Includes FortiCare premium support.
	FC1-10-UCAPF-332-02-DD	FortiAppSec Cloud. Global Server Load Balancing, 10 Health Checks. Includes FortiCare premium support.
Advanced Bot Protection	FC1-10-UCAPF-726-02-DD	FortiAppSec Cloud. Advanced Bot Protection, 1M Trans/Month. Includes FortiCare premium support.

Licensing and Availability

The Service is available as a subscription via the FortiCloud portal. Customers can choose between the **Standard** and **Premium** packages, with options to add Advanced Bot Protection, GSLB, or Threat Analytics as standalone services, if necessary.
